

NAME

`pcap_tstamp_type_name_to_val` – get the time stamp type value corresponding to a time stamp type name

SYNOPSIS

```
#include <pcap/pcap.h>
```

```
int pcap_tstamp_type_name_to_val(const char *name);
```

DESCRIPTION

`pcap_tstamp_type_name_to_val()` translates a time stamp type name to the corresponding time stamp type value. The translation is case-insensitive.

RETURN VALUE

`pcap_tstamp_type_name_to_val()` returns time stamp type value on success and **PCAP_ERROR** on failure.

BACKWARD COMPATIBILITY

This function became available in libpcap release 1.2.1.
