

**NAME**

flatpak-permission-remove – Remove permissions

**SYNOPSIS**

**flatpak permission-remove** [OPTION...] TABLE ID [APP\_ID]

**DESCRIPTION**

Removes an entry for the object with id ID to the permission store table TABLE. The ID must be in a suitable format for the table. If APP\_ID is specified, only the entry for that application is removed.

The permission store is used by portals. Each portal generally has its own table in the permission store, and the format of the table entries is specific to each portal.

**OPTIONS**

The following options are understood:

**-h, --help**

Show help options and exit.

**-v, --verbose**

Print debug information during command processing.

**--ostree-verbose**

Print OSTree debug information during command processing.
