

NAME

besside-ng - crack a WEP or WPA key without user intervention and collaborate with WPA cracking statistics

SYNOPSIS

besside-ng [options] <interface>

DESCRIPTION

besside-ng is a tool which will crack all the WEP networks in range and log all the WPA handshakes. WPA handshakes can be uploaded to the online cracking service at wpa.darkircop.org. Wpa.darkircop.com also provides useful statistics based on user-submitted capture files about the feasibility of WPA cracking.

-b <target mac>

Specifies the target's BSSID

-s <WPA server>

Where to upload capture file for cracking. A good choice is wpa.darkircop.org

-c <chan>

Channel lock

-p <pps>

Packages per second to send (flood rate).

-W

Crack only WPA networks

-v

Verbose mode. Use -vv for more verbose, -vv for even more and so on.

-h

Help screen
