

NAME

ptbl – print a type table

SYNOPSIS

ptbl [-a] <tbl-file>

DESCRIPTION

ptbl prints the given type table to stdout. It will print it in one of two formats: internal style and ASN.1 style. The internal style shows the contents of the type table data structure in ASN.1 value notation. You will need to look at the `tbl.asn1` file to understand the internal form. The ASN.1 form attempts to re-create the ASN.1 that generated the given type table.

OPTIONS

-a Print the table in ASN.1 style (recommended)

FILES

snacc/tbl-tools/ptbl/	Source code for the ptbl program
snacc/asn1specs/tbl.asn1	ASN.1 definition for the type table data structure

BUGS

ptbl does not attempt to print the IMPORTs information even though it is possible with a bit of work.
