

**NAME**

sane-ricoh2 – SANE backend for Ricoh flatbed scanners

**DESCRIPTION**

The **sane-ricoh2** library implements a SANE (Scanner Access Now Easy) backend that provides access to the following Ricoh flatbed scanners:

SG-3110SFNw  
SG-3100SNw  
SP-100SU  
SP-111SU (SP-112SU)

**FILES**

*/usr/lib/x86\_64-linux-gnu/sane/libsane-ricoh2.a*

The static library implementing this backend.

*/usr/lib/x86\_64-linux-gnu/sane/libsane-ricoh2.so*

The shared library implementing this backend (present on systems that support dynamic loading).

**OPTIONS**

The options the backend supports can either be selected through command line options to programs like **scanimage**(1) or through GUI elements in programs like **xscanimage**(1) or **xsane**(1).

The following options are supported by ricoh2:

**--mode color|gray**

Color or grayscale mode.

**--resolution 300|600**

DPI resolution.

**ENVIRONMENT****SANE\_DEBUG\_RICOH2**

If the library was compiled with debug support enabled, this environment variable controls the debug level for this backend. Higher debug levels increase the verbosity of the output.

**SEE ALSO**

**sane**(7), **sane-usb**(5), **scanimage**(1), **xscanimage**(1), **xsane**(1)
