

NAME

cpufreqd-get – Issues "get" commands to cpufreqd.

SYNTAX

cpufreqd-get [-l]

PARAMETERS

-l list applied Profiles for all cpus.

DESCRIPTION

cpufreqd-get issues a command to cpufreqd and reads the returned output. When run without arguments it will issue a "LIST_PROFILES" command, useful for usage with cpufreqd-set. See the PARAMETERS above for more.

COMMANDS**LIST_PROFILES**

cpufreqd-get

Name (#1): On Demand High

Active on CPU#: 0, 1

Governor: ondemand

Min freq: 1000000

Max freq: 1833000

Name (#2): On Demand Low

Governor: ondemand

Min freq: 1000000

Max freq: 1333000

LIST_APPLIED_PROFILES

cpufreqd-get -l

CPU#0: "High Speed 1" ondemand 731500–997500

Near the name (between the parenthesis) you can find the index number to use when setting a specific profile with cpufreqd-set.
