

NAME

gscripior – Perl script to send commands to a smart card using a Gtk GUI

SYNOPSIS

gscripior

DESCRIPTION

This manual page documents briefly the **gscripior** command.

gscripior is a program that sends commands to a smart card using a batch file. The syntax of the commands is the same as for **scriptor(1)**.

scriptor(1) is in text mode. **gscripior(1)** uses a Perl-Gtk graphical user interface and may be more user friendly.

See **scriptor(1)** for details on the commands format.

OPTIONS

none

SEE ALSO

pcscd(1), **scriptor(1)**

AUTHOR

This manual page was written by Ludovic Rousseau <rousseau@debian.org>, for the Debian GNU/Linux system (but may be used by others).
