

NAME

`rtmsrv` – a stub server

SYNOPSIS

`rtmsrv [-z]`

DESCRIPTION

rtmsrv is useful for obtaining all the parameters that a real Flash client would send to an RTMP server, so that they can be used with **rtmpdump**. **rtmpdump** is invoked automatically after parsing a client request.

OPTIONS

`-z` Debug level output. Extremely verbose.

SEE ALSO

rtmpdump(1)
