

NAME

dfctest – Shows display filter byte-code, for debugging dfilter routines.

SYNOPSIS

dfctest [<filter>]

DESCRIPTION

dfctest is a simple tool which compiles a display filter and shows its bytecode.

OPTIONS

filter

The display filter expression. If needed it has to be quoted.

EXAMPLES

Show how the IP protocol is filtered:

```
dfctest ip
```

Shows how frame 150 is filtered:

```
dfctest "frame.number == 150"
```
