

**NAME**

PCRE2 - Perl-compatible regular expressions (revised API)

**SYNOPSIS**

```
#include <pcre2.h>
```

```
PCRE2_SIZE *pcre2_get_ovector_pointer(pcre2_match_data *match_data);
```

**DESCRIPTION**

This function returns a pointer to the vector of offsets that forms part of the given match data block. The number of pairs can be found by calling **pcre2\_get\_ovector\_count()**.

There is a complete description of the PCRE2 native API in the **pcre2api** page and a description of the POSIX API in the **pcre2posix** page.
