

NAME

ddstddecode – Decode a Ricoh DDST stream into human readable form.

SYNOPSIS

ddstddecode [*options*] <*ddst-file*

DESCRIPTION

ddstddecode decodes a Ricoh DDST stream into human readable form.

A Ricoh DDST stream is the printer language used by some Ricoh printers. From what I can tell, it is pbm-tojbg(1) wrapped with some PjL.

COMMAND LINE OPTIONS

These are the options that can appear on the command line.

- d** *basename*
 Basename of .pbm file for saving decompressed planes.
- h** Print hex file offsets.
- o** Print file offsets.
- D** *level*
 Set Debug level [0].

EXAMPLES

Decode an Ricoh DDST stream file created by a Ricoh SP112.

```
$ ddstddecode -h ~/testpage-ricoh-sp112.prn
