

NAME

ts_get_eventpath – get the path to the currently opened touchscreen device file

SYNOPSIS

```
#include <tslib.h>
```

```
char *ts_get_eventpath(struct tsdev *tsdev);
```

DESCRIPTION

ts_get_eventpath() This function returns the path to the touchscreen device file that was opened with `ts_open()`. In case `ts_setup()` is used instead of `ts_open()` directly, it is often not known to the application in advance.

RETURN VALUE

This function returns the path to the touchscreen device file that was opened with `ts_open()`. It returns `NULL` in case of failure.

SEE ALSO

`ts_setup(3)`, `ts_read(3)`, `ts.conf(5)`
