

NAME

ts_config, ts_reconfig – read tslib’s configuration

SYNOPSIS

```
#include <tslib.h>
```

```
int ts_config(struct tsdev *dev);
```

```
int ts_reconfig(struct tsdev *dev);
```

DESCRIPTION

ts_config() loads and initialises all modules configured in the tslib configuration file **TSLIB_CONFFILE**, see ts.conf (5). **ts_reconfig()** re-runs ts_config and updates the configuration if the configuration file has changed.

RETURN VALUE

Zero is returned on success. A negative value is returned in case of an error.
