

NAME

`gtest-report` – test report formatting utility

SYNOPSIS

gtest-report [option...] [gtest-log]

DESCRIPTION

gtest-report is a script which converts the XML output generated by `gtest` into HTML.

Since GLib 2.62, **gtest-report** is deprecated. Use TAP for reporting test results instead, and feed it to the test harness provided by your build system.

OPTIONS

-h, --help

print help and exit

-v, --version

print version information and exit

-s, --subunit

Output subunit. Needs `python-subunit`.
