

NAME

cppw, **cpgr** – copy with locking the given file to the password or group file

SYNOPSIS

cppw [-h] [-s] password_file

cpgr [-h] [-s] group_file

DESCRIPTION

cppw and **cpgr** will copy, with locking, the given file to */etc/passwd* and */etc/group*, respectively. With the **-s** flag, they will copy the shadow versions of those files, */etc/shadow* and */etc/gshadow*, respectively.

With the **-h** flag, the commands display a short help message and exit silently.

SEE ALSO

vipw(8), **vigr**(8), **group**(5), **passwd**(5), **shadow**(5), **gshadow**(5)

AUTHOR

cppw and **cpgr** were written by Stephen Frost, based on **vipw** and **vigr** written by Guy Maor.
