

NAME

dpkg.cfg – dpkg configuration file

DESCRIPTION

This file contains default options for dpkg. Each line contains a single option which is exactly the same as a normal command line option for dpkg except for the leading hyphens which are not used here. Quotes surrounding option values are stripped. Comments are allowed by starting a line with a hash sign ('#').

FILES

*/etc/dpkg/dpkg.cfg.d/[0-9a-zA-Z_-]**

/etc/dpkg/dpkg.cfg

~/dpkg.cfg

SEE ALSO

dpkg(1).
