

NAME

gtscheck – checks that a surface defines a closed, orientable non self-intersecting manifold.

SYNOPSIS

gtscheck [*OPTION*] < *FILE*

DESCRIPTION

This manual page documents briefly the **gtscheck** command.

OPTIONS

These programs follow the usual GNU command line syntax, with long options starting with two dashes ('-'). A summary of options is included below.

-v, --verbose

Print statistics about the surface.

-h, --help

Display the help and exit.

EXIT STATUS

The return status reflects the error encountered: **0** none **1** the input file is not a valid GTS file **2** the surface is not an orientable manifold **3** the surface is an orientable manifold but is self-intersecting

AUTHOR

gtscheck was written by Stephane Popinet <popinet@users.sourceforge.net>.

This manual page was written by Ruben Molina <rmolina@udea.edu.co>, for the Debian project (but may be used by others).
