

NAME

selinux_check_securetty_context – check whether a SELinux tty security context is defined as a securetty context

SYNOPSIS

```
#include <selinux/selinux.h>
```

```
int selinux_check_securetty_context(char *tty_context);
```

DESCRIPTION

selinux_check_securetty_context() returns 0 if tty_context is a securetty context, returns < 0 otherwise.
