

NAME

infotocap – convert a *terminfo* description into a *termcap* description

SYNOPSIS

infotocap [*-vn width*] [*-V*] [*-1*] [*-w width*] *file* ...

DESCRIPTION

infotocap looks in each given text *file* for **terminfo** descriptions. For each terminfo description found, an equivalent **termcap** description is written to standard output. Terminfo **use** capabilities are translated directly to termcap **tc** capabilities.

- v** print out tracing information on standard error as the program runs.
- V** print out the version of the program in use on standard error and exit.
- 1** cause the fields to print out one to a line. Otherwise, the fields will be printed several to a line to a maximum width of 60 characters.
- w** change the output to *width* characters.

FILES

/home/linuxbrew/.linuxbrew/Cellar/ncurses/6.3/share/terminfo
Compiled terminal description database.

NOTES

This utility is actually a link to **tic**, running in *-C* mode. You can use other **tic** options such as **-f** and **-x**.

PORTABILITY

None of X/Open Curses, Issue 7 (2009), SVr4 or NetBSD document this application.

SEE ALSO

infocmp(1), **tic**(1), **ncurses**(3NCURSES), **terminfo**(5)

This describes **ncurses** version 6.3 (patch 20211021).
