

NAME

git-verify-tag – Check the GPG signature of tags

SYNOPSIS

git verify-tag [--format=<format>] <tag>...

DESCRIPTION

Validates the gpg signature created by *git tag*.

OPTIONS

--raw

Print the raw gpg status output to standard error instead of the normal human-readable output.

-v, --verbose

Print the contents of the tag object before validating it.

<tag>...

SHA-1 identifiers of Git tag objects.
