

NAME

p2v-release-notes – virt-p2v Release Notes

RELEASE NOTES FOR VIRT-P2V 1.42.0

These release notes only cover the differences from the previous version. For detailed changelogs, please see the git repository.

- The `rhv-upload` output mode of `virt-v2v` is not listed as output driver, as `virt-p2v` does not provide all the GUI elements to properly use it (Pino Toscano).
- `Virt-v2v` is checked as requirement for the functional tests, in addition to `guestfish`, and `virt-customize` (Pino Toscano).
- `Virt-p2v-make-disk` now sets `p2v.local` as hostname in the generated disk image (Pino Toscano).
- Document `p2v` as initial password for the root user on the disk image generated by `virt-p2v-make-disk`, `virt-p2v-make-kickstart`, and `virt-p2v-make-kiwi` (Pino Toscano).

RELEASE NOTES FOR VIRT-P2V 1.41.0

This is the first standalone release of `virt-p2v`, split from the `libguestfs` sources.

There are no functionality changes compared to `virt-p2v` shipped as part of `libguestfs` 1.40.

RELEASE NOTES FOR HISTORICAL VERSIONS OF VIRT-P2V

Before 1.41.0 `virt-p2v` was released as part of `libguestfs`. Therefore, release notes for these older versions are found as part of the release notes of `libguestfs`.

BUGS

To get a list of bugs against `libguestfs` (which include `virt-p2v`), use this link: <https://bugzilla.redhat.com/buglist.cgi?component=libguestfs&product=Virtualization+Tools>

To report a new bug against `libguestfs`, use this link: https://bugzilla.redhat.com/enter_bug.cgi?component=libguestfs&product=Virtualization+Tools

When reporting a bug, please supply:

- The version of `virt-p2v`.
- Where you got `virt-p2v` (eg. which Linux distro, compiled from source, etc)
- Describe the bug accurately and give a way to reproduce it.
