

NAME

npm-help-search – Search npm help documentation

Synopsis

npm help-search <text>

Note: This command is unaware of workspaces.

Description

This command will search the npm markdown documentation files for the terms provided, and then list the results, sorted by relevance.

If only one result is found, then it will show that help topic.

If the argument to **npm help** is not a known help topic, then it will call **help-search**. It is rarely if ever necessary to call this command directly.

Configuration

<!-- AUTOGENERATED CONFIG DESCRIPTIONS START --> <!-- automatically generated, do not edit manually --> <!-- see lib/utils/config/definitions.js -->

long

- Default: false
- Type: Boolean

Show extended information in **ls**, **search**, and **help-search**. <!-- automatically generated, do not edit manually --> <!-- see lib/utils/config/definitions.js -->

<!-- AUTOGENERATED CONFIG DESCRIPTIONS END -->
