

NAME

expiry – check and enforce password expiration policy

SYNOPSIS

expiry *option*

DESCRIPTION

The **expiry** command checks (**-c**) the current password expiration and forces (**-f**) changes when required.

It is callable as a normal user command.

OPTIONS

The options which apply to the **expiry** command are:

-c, --check

Check the password expiration of the current user.

-f, --force

Force a password change if the current user has an expired password.

-h, --help

Display help message and exit.

FILES

/etc/passwd

User account information.

/etc/shadow

Secure user account information.

SEE ALSO

passwd(5), **shadow(5)**.
