

NAME

stime – set time

SYNOPSIS

```
#include <time.h>
```

```
[[deprecated]] int stime(const time_t *t);
```

Feature Test Macro Requirements for glibc (see **feature_test_macros(7)**):

stime():

Since glibc 2.19:

 _DEFAULT_SOURCE

glibc 2.19 and earlier:

 _SVID_SOURCE

DESCRIPTION

NOTE: This function is deprecated; use **clock_settime(2)** instead.

stime() sets the system's idea of the time and date. The time, pointed to by *t*, is measured in seconds since the Epoch, 1970-01-01 00:00:00 +0000 (UTC). **stime()** may be executed only by the superuser.

RETURN VALUE

On success, zero is returned. On error, -1 is returned, and *errno* is set to indicate the error.

ERRORS**EFAULT**

Error in getting information from user space.

EPERM

The calling process has insufficient privilege. Under Linux, the **CAP_SYS_TIME** privilege is required.

STANDARDS

SVr4.

NOTES

Starting with glibc 2.31, this function is no longer available to newly linked applications and is no longer declared in *<time.h>*.
