

NAME

Dpkg::Exit – program exit handlers

DESCRIPTION

The Dpkg::Exit module provides support functions to run handlers on exit.

FUNCTIONS

push_exit_handler(\$func)

Register a code reference into the exit function handlers stack.

pop_exit_handler()

Pop the last registered exit handler from the handlers stack.

run_exit_handlers()

Run the registered exit handlers.

CHANGES**Version 2.00 (dpkg 1.20.0)**

Hide variable: @handlers.

Version 1.01 (dpkg 1.17.2)

New functions: **push_exit_handler()**, **pop_exit_handler()**, **run_exit_handlers()**

Deprecated variable: @handlers

Version 1.00 (dpkg 1.15.6)

Mark the module as public.
