

**NAME**

systemd-user-sessions.service, systemd-user-sessions – Permit user logins after boot, prohibit user logins at shutdown

**SYNOPSIS**

systemd-user-sessions.service

/lib/systemd/systemd-user-sessions

**DESCRIPTION**

systemd-user-sessions.service is a service that controls user logins through **pam\_nologin**(8). After basic system initialization is complete, it removes /run/nologin, thus permitting logins. Before system shutdown, it creates /run/nologin, thus prohibiting further logins.
