

NAME

`cryptdisks_stop` – wrapper around `cryptsetup` that parses `/etc/crypttab`.

SYNOPSIS

`cryptdisks_stop` *<name>*

DESCRIPTION

`cryptdisks_stop` is a wrapper around **`cryptsetup`** that parses **`/etc/crypttab`** just like the `init`script `/etc/init.d/cryptdisks` does and stops the dm-crypt mapping that corresponds to *<name>*.

SEE ALSO

cryptdisks_start(8), *cryptsetup(8)*, *crypttab(5)*
