

NAME

gconf-schemas – register gconf schemas with the gconf database

SYNOPSIS

gconf-schemas [**--register|unregister|register-all**] [*schema1*] [*schema2*] [...]

DESCRIPTION

This manual page documents briefly the **gconf-schemas** command.

gconf-schemas is used to register gconf schemas with the gconf database.

OPTIONS**--register**

register schemas to the GConf database

--unregister

unregister schemas from the GConf database

--register-all

clean up the GConf database and register all schemas again. This might be necessary if your gconf database becomes corrupted.

--no-signal

do not send SIGHUP to the running gconfd-2 processes.
