

NAME

tracker3-import – Import data into a Tracker database.

SYNOPSIS

tracker3 import FILE.ttl

DESCRIPTION

tracker3 import imports data into a Tracker database.

The data must conform to the existing ontology of the database.

The data must be in Turtle format. You can use a tool such as rapper(1) to convert the data from other formats to Turtle.

SEE ALSO

tracker3-export(1), **tracker3-sparql(1)**.
