

NAME

msexpand – decompress data compressed using **mscompress(1)** or **COMPRESS.EXE**

SYNOPSIS

msexpand [**-h**]
msexpand [**-V**]
msexpand [*name ...*]

DESCRIPTION

Msexpand decompress files compressed using **mscompress(1)** or Microsoft **COMPRESS.EXE** utility (e.g. Windows 3.x installation files). If no files are specified, the standard input is decompressed to the standard output.
