

**NAME**

fc-validate – validate font files

**SYNOPSIS**

**fc-validate** [ **-Vhv** ]

[ [ **-i** *index* ] [ **--index** *index* ] ] [ [ **-l** *lang* ] [ **--lang** *lang* ] ] [ **--verbose** ] [ **--version** ] [ **--help** ] *font-file...*

**DESCRIPTION**

**fc-validate** validates *font-file*(s) if each fonts satisfies the language coverage according to the orthography files in fontconfig. If **--index** is given, only one face of each file is validated, otherwise all faces are validated.

**OPTIONS**

This program follows the usual GNU command line syntax, with long options starting with two dashes ('-'). A summary of options is included below.

- i** Only query face indexed *index* of each file.
- l** Set *lang* as a language instead of current locale. this is used for **-m**.
- v** Show more detailed information.
- V** Show version of the program and exit.
- h** Show summary of options.

*font-file*

Query *font-file* for font faces.

**RETURN CODES**

**fc-validate** returns error code 0 for successful parsing, or 1 if any errors occurred or if at least one font face could not be opened.
