

NAME

exfatlabel – Get or Set volume label or volume serial of an exFAT filesystem

SYNOPSIS

exfatlabel [**-i** *volume-label*] [**-v**] *device* [*label_string or serial_value*]

exfatlabel -V

DESCRIPTION

exfatlabel Print or set volume label of an existing exFAT filesystem.

If there is a *label_string* in argument of exfatlabel, It will be written to volume label field on given device. If not, exfatlabel will just print out after reading volume label field from given device. If **-i** or **--volume-serial** is given, It can be switched to volume serial mode.

OPTIONS

- i** Switch to volume serial mode.
- V** Prints the version number and exits.
