

NAME

PCRE2 - Perl-compatible regular expressions (revised API)

SYNOPSIS

```
#include <pcre2.h>

int pcre2_set_recursion_memory_management(
    pcre2_match_context *mcontext,
    void (*private_malloc)(PCRE2_SIZE, void *),
    void (*private_free)(void *, void *), void *memory_data);
```

DESCRIPTION

From release 10.30 onwards, this function is obsolete and does nothing. The result is always zero.

There is a complete description of the PCRE2 native API in the **pcre2api** page and a description of the POSIX API in the **pcre2posix** page.
