

NAME

`accessdb` – dumps the content of a man-db database in a human readable format

SYNOPSIS

`/usr/sbin/accessdb [-d?V] [<index-file>]`

DESCRIPTION

accessdb will output the data contained within a man-db database in a human readable form. By default, it will dump the data from `/var/cache/man/index.<db-type>`, where `<db-type>` is dependent on the database library in use.

Supplying an argument to `accessdb` will override this default.

OPTIONS

-d, --debug

Print debugging information.

-, --help

Print a help message and exit.

--usage

Print a short usage message and exit.

-V, --version

Display version information.
