

NAME

update-ccache-symlinks – update symlinks in /usr/lib/ccache

SYNOPSIS

update-ccache-symlinks

DESCRIPTION

update-ccache-symlinks creates and removes symlinks in */usr/lib/ccache*. See the **ccache** man page for more information.

It is normally not necessary to run **update-ccache-symlinks** by hand as this is done automatically when compiler packages are removed or installed.
