

**NAME**

git-version – Display version information about Git

**SYNOPSIS**

*git version* [—build—options]

**DESCRIPTION**

With no options given, the version of *git* is printed on the standard output.

Note that **git** **—version** is identical to **git version** because the former is internally converted into the latter.

**OPTIONS**

—build—options

Include additional information about how git was built for diagnostic purposes.
