

NAME

mq_getsetattr – get/set message queue attributes

SYNOPSIS

```
#include <mqueue.h>      /* Definition of struct mq_attr */
#include <sys/syscall.h>  /* Definition of SYS_* constants */
#include <unistd.h>

int syscall(SYS_mq_getsetattr, mqd_t mqdes,
            const struct mq_attr *newattr, struct mq_attr *oldattr);
```

DESCRIPTION

Do not use this system call.

This is the low-level system call used to implement **mq_getattr**(3) and **mq_setattr**(3). For an explanation of how this system call operates, see the description of **mq_setattr**(3).

STANDARDS

This interface is nonstandard; avoid its use.

NOTES

Never call it unless you are writing a C library!
