

NAME

pnmmargin - add a border to a portable anymap

SYNOPSIS

pnmmargin [-white|-black|-color *colorspec*] *size* [*pnmfile*]

DESCRIPTION

Reads a portable anymap as input. Adds a border of the specified number of pixels, and produces a portable anymap as output.

OPTIONS

You can specify the border color with the **-white**, **-black**, and **-color** flags. If no color is specified, the program makes a guess.

SEE ALSO

pnm(5)

BUGS

It's a script. Scripts are not portable to non-Unix environments.
