

NAME

Mail::Box::FastScalar – fast alternative to IO::Scalar

DESCRIPTION

Contributed by “Todd Richmond” (richmond@proofpoint.com) This package should be released as separate package, but till then is incorporated in the Mail::Box module.

Extremely fast IO::Scalar replacement – >20x improvement in getline(s)()

Warnings

You cannot modify the original reference between calls unless you `$obj->seek(1, 0)` to reset the object – VERY rare usage case

`$/` must be undef or string – "" and \scalar unimplemented

SEE ALSO

This module is part of Mail-Message distribution version 3.012, built on February 11, 2022. Website: <http://perl.overmeer.net/CPAN/>
