

NAME

rpc_gss_getcred — Get authorization information for an RPC request

SYNOPSIS

```
#include <rpc/rpcsec_gss.h>

AUTH *
rpc_gss_getcred(struct svc_req *req, rpc_gss_rawcred_t **rcred,
                rpc_gss_ucred_t **ucred, void **cookie);
```

DESCRIPTION

This function returns the RPCSEC_GSS authenticated credentials associated with an RPC request.

PARAMETERS

<code>req</code>	The RPC request to query
<code>rcred</code>	If non-null, <i>*rcred</i> is set to point at the raw credentials for this request
<code>ucred</code>	If non-null, <i>*ucred</i> is set to point at the corresponding unix credentials
<code>cookie</code>	If non-null, <i>*cookie</i> is set to the cookie value returned by a callback function registered with rpc_gss_set_callback()

RETURN VALUES

Returns TRUE if successful, FALSE otherwise.

AVAILABILITY

The **rpc_gss_getcred()** function is part of libtirpc.
