

NAME

Locale::RecodeData::UTF_8 – Conversion routines for UTF-8

SYNOPSIS

This module is internal to libintl. Do not use directly!

DESCRIPTION

This modules contains the conversion tables for UTF-8. It is capable of converting from UTF-8 to the internal format of libintl-perl and vice versa. It is only suitable for Perl versions <= 5.8.0. However, you do not have to bother about version checking, **Locale::Recode** (3) will do that for you.

CHARACTER TABLE

See <http://www.unicode.org/>.
