NAME

cryptdisks_stop - wrapper around cryptsetup that parses /etc/crypttab.

SYNOPSIS

cryptdisks_stop <name>

DESCRIPTION

cryptdisks_stop is a wrapper around **cryptsetup** that parses /**etc/crypttab** just like the initscript /etc/init.d/cryptdisks does and stops the dm–crypt mapping that corresponds to <*name*>.

SEE ALSO

cryptdisks_start(8), cryptsetup(8), crypttab(5)
