## **NAME**

dpkg.cfg - dpkg configuration file

## **DESCRIPTION**

This file contains default options for dpkg. Each line contains a single option which is exactly the same as a normal command line option for dpkg except for the leading hyphens which are not used here. Quotes surrounding option values are stripped. Comments are allowed by starting a line with a hash sign ('#').

## **FILES**

```
/etc/dpkg/dpkg.cfg.d/[0-9a-zA-Z_-]*
/etc/dpkg/dpkg.cfg
~.dpkg.cfg
```
