NAME

PCRE2 - Perl-compatible regular expressions (revised API)

SYNOPSIS

#include <pcre2.h>
int pcre2_set_depth_limit(pcre2_match_context *mcontext,
 uint32_t value);

DESCRIPTION

This function sets the backtracking depth limit field in a match context. The result is always zero.

There is a complete description of the PCRE2 native API in the **pcre2api** page and a description of the POSIX API in the **pcre2posix** page.
