NAME

drand48_r, erand48_r, lrand48_r, mrand48_r, jrand48_r, srand48_r, seed48_r, lcong48_r - generate uniformly distributed pseudo-random numbers reentrantly

LIBRARY

```
Standard C library (libc, -lc)
```

SYNOPSIS

```
#include <stdlib.h>
    int drand48_r(struct drand48_data *restrict buffer,
             double *restrict result);
    int erand48_r(unsigned short xsubi[3],
             struct drand48_data *restrict buffer,
             double *restrict result);
    int lrand48_r(struct drand48_data *restrict buffer,
             long *restrict result);
    int nrand48_r(unsigned short xsubi[3],
             struct drand48_data *restrict buffer,
             long *restrict result);
    int mrand48_r(struct drand48_data *restrict buffer,
             long *restrict result);
    int jrand48_r(unsigned short xsubi[3],
             struct drand48_data *restrict buffer,
             long *restrict result);
    int srand48_r(long int seedval, struct drand48_data *buffer);
    int seed48_r(unsigned short seed16v[3], struct drand48_data *buffer);
    int lcong48_r(unsigned short param[7], struct drand48_data *buffer);
Feature Test Macro Requirements for glibc (see feature_test_macros(7)):
    All functions shown above:
       /* glibc >= 2.19: */ _DEFAULT_SOURCE
```

DESCRIPTION

These functions are the reentrant analogs of the functions described in **drand48**(3). Instead of modifying the global random generator state, they use the supplied data *buffer*.

Before the first use, this struct must be initialized, for example, by filling it with zeros, or by calling one of the functions $srand48_r()$, $seed48_r()$, or $lcong48_r()$.

RETURN VALUE

The return value is 0.

ATTRIBUTES

For an explanation of the terms used in this section, see **attributes**(7).

|| /* glibc <= 2.19: */ _SVID_SOURCE || _BSD_SOURCE

Interface	Attribute	Value
drand48_r(), erand48_r(), lrand48_r(), nrand48_r(),	Thread safety	MT-Safe race:buffer
mrand48_r(), jrand48_r(), srand48_r(), seed48_r(),		
lcong48_r()		

STANDARDS

These functions are GNU extensions and are not portable.
