NAME

setlogcons − Send kernel messages to console N

SYNOPSIS

setlogcons *N*

DESCRIPTION

The command **setlogcons** *N* sets all kernel messges to the console specified as N.

By default kernel messages are sent to the current console.

To change the level of messages sent, use **dmesg**

AUTHORS

setlogcons was originally written by Andries Brouwer for the kbd package.

This manual page was written by Alastair McKinstry.
