NAME

DPMSEnable – enables DPMS on the specified display

SYNOPSIS

cc [*flag ...*] *file ...* -**lXext** [*library ...*]

#include <X11/extensions/dpms.h>

Status DPMSEnable (Display *****display);

ARGUMENTS

display   Specifies the connection to the X server

DESCRIPTION

The *DPMSEnable* function enables Display Power Management Signaling (DPMS) on the specified *display.* When DPMS is enabled, DPMS will use the currently saved timeout values. It will trigger the appropriate DPMS power level based on the timeout values. Refer to *DPMSSetTimeouts.* All physical screens are affected by *DPMSEnable* at the same time.

If *DPMSEnable* is invoked on a display which has DPMS already enabled, or on a display which does not support DPMS, no change is made and no error is returned.

RETURN VALUES

TRUE   The *DPMSEnable* function always returns TRUE.
