NAME

kvm-spice, qemu-system-x86_64-spice – compatibility names for qemu-system-x86_64

DESCRIPTION

The two names are aliases for **qemu-system-x86_64**, where kvm-spice enables kvm native hardware mode by default. These names are kept for backward compatibility wih old package, when spice-enabled qemu were packaged separately. Now main qemu-system has spice functionality built in. Please use **qemu-system-x86_64** instead of the old compat names.

SEE ALSO

qemu-system-x86_64(1).
