NAME

XtDisplayStringConversionWarning – issue a conversion warning message

SYNTAX

#include <X11/Intrinsic.h>

void XtDisplayStringConversionWarning(Display* *display*, const char **from_value*, const char **to_type*);

ARGUMENTS

display   Specifies the display connection with which the conversion is associated.

from_value   Specifies the string that could not be converted.

to_type   Specifies the target representation type requested.

DESCRIPTION

The **XtDisplayStringConversionWarning** function issues a warning message using **XtAppWarningMsg** with name "conversionError", type "string", class "XtToolkitError", and the default message string "Cannot convert "*from_value*" to type *to_type*".

To issue other types of warning or error messages, the type converter should use **XtAppWarningMsg** or **XtAppErrorMsg**.
