NAME
deb−src−files − Debian distribute files format

SYNOPSIS
debian/files

DESCRIPTION
This file contains the list of artifacts that are to be distributed via the **.changes** control file.

The *debian/files* file has a simple whitespace-delimited format.

filename section priority [*keyword=value...*]

filename is the name of the artifact to distribute.

section and *priority* correspond to the respective control fields available in the .deb. The allowed values are specific to each distribution archive.

keyword=value... corresponds to an optional whitespace-delimited list of attributes for this entry. The only currently supported keyword is **automatic** with value **yes**, to mark automatically generated files.

NOTES
This file is not intended to be modified directly, please use one of **dpkg-gencontrol** or **dpkg-distaddfile** to add entries to it.
